DETAILED ACTION

Authorization for this examiner's amendment was given in a telephone interview with Mark D. Saralino on August 26, 2004.

Allowable Subject Matter

Claims 5-6 and 13-14 are allowed.

The following is an examiner’s statement of reasons for allowance:

Claims 5-6 and 13-14 are allowed because the claimed invention comprises a receiver and corresponding method for receiving a digital carrier signal. The receiver comprises an adaptive equalizer that selects and utilizes a set of adaptive filter coefficients from a plurality of sets of coefficients to equalize the digital carrier signal. Each set of coefficients represents distortion characteristics resulting from the network topology of a transmitter at a particular physical location on the network. The closest prior art, Nguyen (cited in office action mailed June 28, 2004) teach a similar circuit including an adaptive equalizer, however, Nguyen fails to teach selecting and using a coefficient set from a plurality of sets, the set representing distortion characteristics resulting from the network topology and physical location of a particular transmitter on the network. This distinct feature has been included in independent claims 5 and 13, rendering them allowable. Claims 6 and 14 depend on independent claims 5 and 13, respectively, and are thereby allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
